

GenWatch ATIA

Performance Management for ASTRO® 25 Systems
SIMPLIFY REPORTING • VALIDATE DECISIONS • SAVE TIME

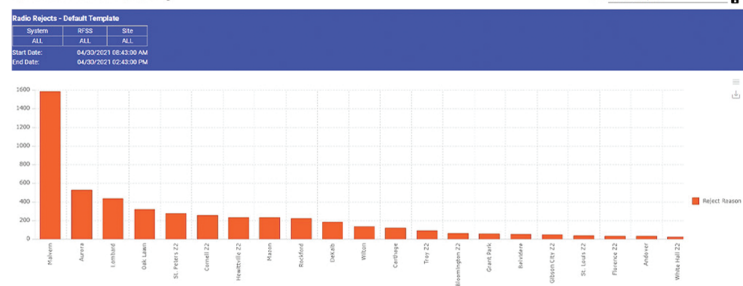

GenWatch ATIA is an on-premise, browser-delivered software solution that monitors and manages radio traffic and system information collected from a Motorola ASTRO® 25 system. Radio System Managers can maintain constant visibility into how their system is performing, helping them make more informed and data-driven decisions.

This information is available in a centralized location to be monitored, managed, and stored for as long as needed. Additionally, multiple live views enhance visibility and provide real-time insight into system performance.

SIMPLIFY REPORTING

The most powerful feature of GenWatch is the in-depth reporting capability. Data received on all ASTRO 25 system-wide activity is collected and archived for as long as needed without any loss of detail. Long-term archiving allows for more significant historical and in-depth forensic analysis of how the network is performing.

Radio System Managers can run reports across systems, zones, sites, channels, agencies, talkgroups, and subscribers based on their unique reporting needs. For recurring reports, GenWatch offers the ability to schedule, email, and distribute reports.

GenWatch ATIA

Performance Management for ASTRO® 25 Systems
SIMPLIFY REPORTING • VALIDATE DECISIONS • SAVE TIME

SAVE TIME & VALIDATE DECISIONS

GenWatch monitors real-time radio system activity, including mobility, busies, site usage, and channel usage. Live views display system-wide information in various ways, such as map-based site performance indicators, channel activity display, activity display, site drill-down, radio quick search, and live weather layers.

Radio System Managers can identify system performance anomalies quickly and proactively to address potential issues. The Key Performance Indicator Dashboards calculate historical averages for timely trend analysis and comparisons. Critical system event notifications can also be created and automatically sent to key personnel.
