Performance Management for ASTRO® 25 Systems  
**SIMPLIFY REPORTING • VALIDATE DECISIONS • SAVE TIME**

## TRANSFORMING RADIO SYSTEM MANAGEMENT

GenWatch is an on-premise, browser-delivered software solution engineered to monitor and manage radio traffic and system information from Motorola ASTRO® 25 systems. The solution gives Radio System Managers constant visibility into system performance, so decisions are data-driven, timely, and effective.

## REAL-TIME VISIBILITY AND DATA-DRIVEN DECISIONS

By aggregating multiple data streams, GenWatch ensures that Radio System Managers have continuous insight into multiple aspects of system performance. This real-time monitoring of radio traffic, fault and location data means that anomalies can be spotted quickly, enabling a proactive approach to troubleshooting and maintenance.

## CENTRALIZED CONTROL AND ENHANCED REPORTING

The platform's extensive archiving capabilities offer an empirical basis for decision-making. Instead of relying on sporadic system checks or anecdotal evidence, managers have access to trend analyses and contextual performance reports. This helps identify trends and pinpoint issues before they escalate into larger problems.

Consolidating system data in one centralized location simplifies the management process. All critical system metrics and historical records are stored together, making it easier to monitor performance, conduct forensics, and ensure compliance with operational standards.

# GenWatch ATIA

Performance Management for ASTRO® 25 Systems

**SIMPLIFY REPORTING • VALIDATE DECISIONS • SAVE TIME**

The ability to report on archived data from a system, zone, site, talk-group or subscriber level means that every report can be tailored to address specific operational questions and improve strategic planning and resource allocation.

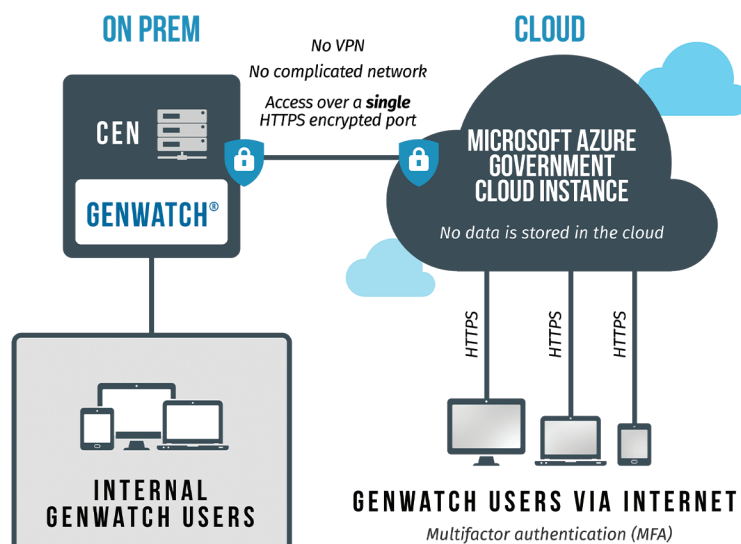

## OPTIMIZED RESOURCE ALLOCATION

With tools like interactive views, business intelligence style dashboards, and event-driven notifications, managers can direct resources precisely where they are needed, preventing wasteful, reactive maintenance and enabling more efficient use of financial, human and technical resources.

## GENWATCH ANYWHERE — ON-DEMAND ACCESS & SECURITY

GenWatch Anywhere makes GenWatch accessible from anywhere with secure access via a single HTTPS encrypted port between GenWatch (on prem) and Microsoft Azure Government. Developed in partnership with Microsoft Azure Government, GenWatch Anywhere is built with a security-first mindset. Multi-factor authentication is required for access and all data is stored locally not in the cloud.

**YOU DESERVE TO GET THE MOST OUT OF YOUR ASTRO 25 SYSTEM INVESTMENT!**
