

# GenWatch UEM Enhancement

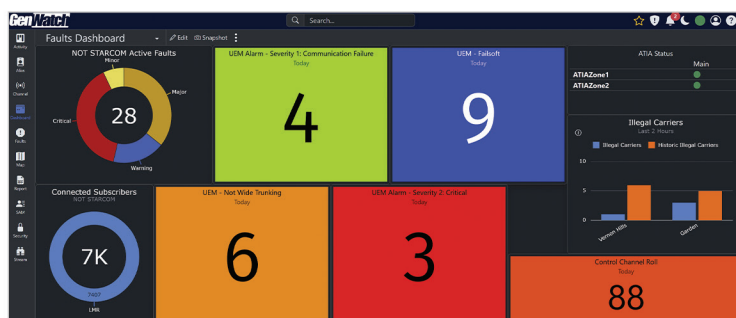

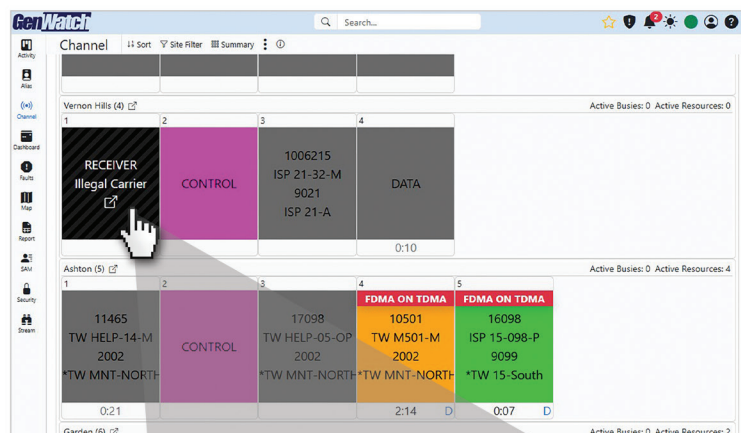

Enriching GenWatch with Fault Management Data  
**SIMPLIFY REPORTING • VALIDATE DECISIONS • SAVE TIME**

Maintaining high system availability and performance is essential to public safety communications. As a Radio System Manager, it is crucial to assess service-impacting events quickly. The GenWatch® Unified Event Manager (UEM) Enhancement monitors the health of an ASTRO® 25 system, delivering real-time visibility into device status and performance metrics. Customizable dashboards empower you to focus on what matters most to you, supporting smarter decisions through integrated business intelligence.

## IMPROVED WORKLOAD PRIORITIZATION

When an incident occurs, it often results in a flood of alarms sent to the Motorola UEM. Intelligent alarm throttling and filtering suppresses redundant alerts during major incidents, reducing information overload, while user-defined filters guarantee that only alarms meeting your severity or device criteria trigger notifications. Alarms can also be forwarded to an upstream manager for additional network visibility.

Alarms

State	Start DT	End DT	Device	Description	Entity	Context
Warning	7/15/2023, 3:44:00 PM	7/15/2023, 3:44:02 PM	chan1.sitel-zone1	Illegal Carrier Present - 90	RECEIVER	chan1.sitel-zone1
Warning	7/15/2023, 3:44:37 PM	7/15/2023, 3:44:39 PM	chan1.sitel-zone1	Illegal Carrier Present - AugRSSI-70 dbm, ReUNKNOWN	RECEIVER	chan1.sitel-zone1
Critical	7/15/2023, 3:44:21 PM	7/15/2023, 3:44:23 PM	201_sitel4	MAJFUNCTIONED, CHANNEL HW FAILURE	Channel 6	201_sitel4
Critical	7/15/2023, 3:44:18 PM	7/15/2023, 3:44:19 PM	201_sitel4	MAJFUNCTIONED, CHANNEL HW FAILURE	Channel 5	201_sitel4
Warning	7/15/2023, 3:33:03 PM	7/15/2023, 3:33:05 PM	chan1.sitel-zone1	Illegal Carrier Present - 90	RECEIVER	chan1.sitel-zone1

## TRENDING AND REPORTING

Every alarm data packet includes detailed information: timestamped events, impacted equipment, and plain-language descriptions that make analysis easy. These alarms are stored in SQL databases, enabling detailed forensic reporting and trend analysis—so you can pinpoint recurring issues, plan maintenance, and keep your network running at peak quality of service.

Reports such as Site and Channel Availability empower you to plan ahead and reduce failure risk by identifying weak points before they disrupt operations.

This enhancement simplifies reporting workflows, reinforces decision-making with reliable data, and saves valuable time for your team. It ensures you are getting the best value and operational longevity from your ASTRO® 25 system investment.

**YOU DESERVE TO GET THE MOST  
OUT OF YOUR ASTRO 25 SYSTEM  
INVESTMENT!**
