

GENWATCH® CADI

**Connect to multiple CAD clients on
your ASTRO® 25 network.**

SIMPLIFY REPORTING. VALIDATE DECISIONS. SAVE TIME.

The GenWatch® Multi-CADI Enhancement allows multiple CAD clients access to ASTRO® 25 systems. With the CADI enhancement, CAD clients can send radio commands, and receive PTT IDs and Emergencies. The solution is very flexible in that it overcomes the radio system limitation of being able to connect to only one CAD client.
